ELSEVIER

Volume 55, December (1995) 459–461

Journal of Materials Processing Technology

Contents for Volume 55

Dedication x

Preface xii

A consistent relationship between the stress- and strain-components and its application for analyzing the plane-stress forming process 1
Z.R. Wang (Harbin, People's Republic of China)

Strength analysis and optimization for both the cylinder and the anvil of a BELT-type ultra-high-pressure apparatus by FEM 5
W. Qiang, L. Wei, L. Dejun, He Fang (Jinan, People's Republic of China),
Z.R. Wang (Harbin, People's Republic of China)

The integral hydro-bulge forming of double-layer gap spherical vessels 11
S.-H. Zhang, L. Jiang, Z.R. Wang (Harbin, People's Republic of China)

Research into the properties and microstructure of ZA13 alloy tubes formed by liquid extrusion 19
H.-J. Li, L.-H. Qi, S.-J. Luo, W.-C. Huo, Z.R. Wang (Harbin, People's Republic of China)

Simulation of superplastic sheet forming and bulk forming 24
K. Zhang, Q. Zhao, C. Wang, Z.R. Wang (Harbin, People's Republic of China)

An experimental study of the roll-bending of double-curvature workpieces 28
W.-L. Hu, Z.R. Wang (Harbin, People's Republic of China)

An investigation into the plastic formability of welded joints 33
S.-J. Yuan, Z.R. Wang (Harbin, People's Republic of China)

Hot hydrostatic extrusion and microstructures of mechanically alloyed Al–4.9Fe–4.9Ni alloy 37
L. Guoxian, L. Zhimin, W. Erde, W. Zhongren (Harbin, People's Republic of China)

An advanced superplastic sheet-forming machine controlled by microcomputer 43
X. Huilin, Z. Kaifeng, Q. Yu, Z.R. Wang (Harbin, People's Republic of China)

Numerical simulations for extrusion and ironing and die-angle optimization 48
Z. Yanran, Z.R. Wang, C. Weimin (Harbin, People's Republic of China)

Preface xvi

Wire drawing at elevated temperatures using different die materials and lubricants 53
M.T. Hillery (Limerick, Ireland), V.J. McCabe (Dublin, Ireland)

Effect of impact and fatigue loads on the strength of plain weave carbon–epoxy composites 58
Y.Q. Ding, Y. Yan, R. McIlhagger (Newtownabbey, UK)

Surface abuse when machining cast iron (G-17) and nickel-base superalloy (Inconel 718) with ceramic tools 63
E.O. Ezugwu, S.H. Tang (London, UK)

Electrochemical grinding of ceramic form tooling 70
T.M.A Maksoud, A.J. Brooks (Wales, UK)

Development of the twin-roll casting process 76
R. Cook, P.G. Grocock, P.M. Thomas (Poole, UK), D.V. Edmonds, J.D. Hunt (Oxford, UK)

Ultrasonic non-destructive evaluation of the matrix structure and the graphite shape in cast iron 85
D.N. Collins (Dublin, Ireland), W. Alcheikh (Damascus, Syria)

Intelligent tool selection system 91
W.G. Keating (Hebburn, UK), P.R. Lewis (Dundee, UK), J.E.L. Simmons (Edinburgh, UK), P.G. Maropoulos (Durham, UK)

Forging sequence design using an expert system 95
D. Glynn, G. Lyons, J. Monaghan (Dublin, Ireland)

An upper-bound analysis of a forging–extrusion process 103
J. Vickery, J. Monaghan (Dublin, Ireland)

An expert system shell for the selection of metal-cutting parameters 111
V.I. Vitanov (Portsmouth, UK), D.K. Harrison (Glasgow, UK), N.H. Mincoff (Sofia, Bulgaria), T.V. Vladimirova (Guildford, UK)

Elsevier Science S.A.

The effect of post-weld heat-treatment on mechanical-properties and residual-stresses mapping in welded structural steel . 117
A.G. Olabi, M.S.J. Hashmi (Dublin, Ireland)

Computer-aided analysis of a surface-roughness model for end milling 123
M. Alauddin, M.A. El Baradie, M.S.J. Hashmi (Dublin, Ireland)

Joining of carbon fibre–copper composite to metals 129
K. Pietrzak (Warsaw, Poland)

Steel wire galvanizing by the VERT-DOWN method 134
J.G. Szota (Gliwice, Poland)

Ageing behaviour of 2024-Al alloy reinforced with Al_2O_3 particles 140
A.N. Abdel-Azim, S.F. Mostafa, A. Younan (Eltabbin Helwan, Egypt), Y. Shash (Giza, Egypt)

Instability limits to the forming of sheet metals 146
D.W.A. Rees (Middlesex, UK)

The microstructure and wear mechanism of a novel high-strength, wear-resistant zinc alloy (ZMJ) 154
Y. Li, J. Luo, Z. Luo, Z. Xiao, T.L. Ngai (Guangzhou, People's Republic of China)

Experimental determination of dynamic forces during transient orthogonal cutting 162
A.A. Hamid, Y. Ali (Cairo, Egypt)

Comparison of the fatigue behaviour of 2-D and 3-D woven fabric reinforced composites 171
Y.Q. Ding, Y. Yan, R. McIlhagger, D. Brown (Newtownabbey, Ireland)

The modeling of liquid and solid foams 178
D. Weaire, S. Coughlan (Dublin, Ireland), A.M. Fortes (Lisbon, Portugal)

Production of spheroidal graphite aluminium cast iron and the factors affecting it 186
M.M. Haque (Dhaka, Bangladesh), J.M. Young (Birmingham, UK)

Effects of strontium on the structure and properties of aluminium–silicon alloys 193
M.M. Haque (Dhaka, Bangladesh)

Casting of 2024-Al alloy reinforced with Al_2O_3 particles 199
A.N. Abdel-Azim, Y. Shash, S.F. Mostafa, A. Younan (Giza, Egypt)

Electrochemical impedance spectroscopy to monitor the influence of surface preparation on the corrosion characteristics of mild steel MAG welds 206
J. Colreavy, J.D. Scantlebury (Manchester, UK)

A Few methods of analytical calculation of forming-limit curves 213
J. Gronostajski, Z. Zimniak (Poland)

Optimisation of aluminium sheet forming using a flexible die 218
D.J. Browne (Dublin, Ireland), E. Battikha (Damascus, Syria)

Ultra-tough synthetic glasses made by reactive blending of PMMA and EVA rubbers: opto-thermal characterization 224
U. Bernini, P. Russo (Naples, Italy), M. Malinconico, E. Martuscelli, P. Mormile, M.G. Volpe (Arco Felice, Italy), A. Novellino, (Rome, Italy)

On the fracture of reinforced thermoplastics 229
V.V. Meshkov, O.V. Kholodilov, A.I. Sviridenok (Belarus, CIS)

The structure and properties of metal and metal–ceramic coatings produced by physical vapour deposition 234
A.I. Rybnikov, A.A. Tchizhik, A.P. Ogurtsov (St. Petersburg, Russia), I.S. Malashenko, K.Y. Yakovchuk (Kiev, Ukraine)

A simple method of analysis for the preliminary design of particular composite laminated primary structures for civil construction 242
D.H. Kim (Seoul, South Korea)

Preparation of chemically active powders of niobium and titanium oxides and synthesis of dielectric ceramic materials 249
A.A. Titov, V.A. Krokhin (Moscow, Russia), N.K. Zhulanov, D.L. Melnikov (Solikamsk, Russia)

Computer-aided design of acoustic horns for ultrasonic machining using finite-element analysis 254
S.G. Amin, M.H.M. Ahmed, H.A. Youssef (Alexandria, Egypt)

Thermo-elasto–plastic behaviour of a metal-matrix composite Al-6061/SiC and the effect of a precipitate-free zone around the reinforcement 261
B. Lay, M. Boivin (Villeurbanne, France)

Applications and product development in varistor technology 268
R. Puyané (Dundalk, Ireland)

Dislocation reduction in GaAs crystals grown from the Czochralski process 278
N. Subramanyam, C.T. Tsai (Boca Raton, USA)

Effect of the preparation conditions upon the stabilization of the superconducting properties of Bi(Pb) SrCaCuO 288
A.A. Titov, S.P. Kobeleva (Moscow, Russia), A.D. Shevchenko (Kiev, Ukraine)

Prediction of resources of materials of machine and construction elements in the process of manufacture and exploitation . 292
V.G. Burdukovsky, V.L. Kolmogorov, B.A. Migachev (Ekateringburg, Russia)

The use of images in a language- and culture-independent expert system for diagnosing pressure die-casting defects 296
C.A.G. Webster (Middlesbrough, UK)

Piezoelectrically-active defects and their impact on the performance of GaAs MESFETs 303
P.J. McNally, J.K. McCaffrey, A. Baric (Dublin, Ireland)

XPS study of some calcium compounds 311
B. Demri, D. Muster (Strasbourg Cedex, France)

Simulation and assessment of the leakage characteristics and suitability of Rhone–Poulenc's 'ISCEON 69' blends as refrigerants 315
D. Crombie (Galway, Ireland), M.S.J. Hashmi (Dublin, Ireland)

Tool-life testing in the end milling of Inconel 718 321
M. Alauddin, M.A. El Baradie, M.S.J. Hashmi (Dublin, Ireland)

Die design for axisymmetric extrusion 331
N.V. Reddy, P.M. Dixit, G.K. Lal (Kanpur, India)

Study on the method for groove design in the helical rolling of steel balls 340
W. Quanxian, W. Qiping (Maanshan, People's Republic of China), X. Jianming (Nanjing, People's Republic of China)

Polymeric magnetic fibrous filters 345
L.S. Pinchuk, L.V. Markova, Y.V. Gromyko, E.M. Markov (Gomel, Belarus), U.S. Choi (Seoul, South Korea)

A finite-element analysis of magnetically driven recirculating flow in electromagnetic near net shape casting 351
B.Q. Li (Baton Rouge, USA)

Influence of the die arc on formability in cylindrical cup-drawing 360
Y.-M. Huang, J.-W. Cheng (Taiwan, People's Republic of China)

The effect of applied pressure on particle-dispersion characteristics and mechanical properties in melt-stirring squeeze-cast SiC_p/Al composites 370
Y.-H. Seo, C.-G. Kang (Pusan, South Korea)

An energy-distribution strategy in fast-cutting wire EDM 380
Y.F. Luo (Binghamton, USA)

Use of FEM as an effective teaching tool and as a flexible aid in the simulation of manufacturing processes and multiple rigid-body collisions 391
E. Shaghouei, D.C. Webb, K. Kormi (Leeds, UK)

Analysis of die designs for the stamping of an automobile rear floor panel 408
F.-K. Chen, J.-H. Liu (Taiwan, People's Republic of China)

Wire-electrochemical cutting with a $NaNO_3$ electrolyte 417
M.A. Béjar, F. Eterovich (Santiago, Chile)

Study on the grinding of Inconel 718 421
P.-L. Tso (Taiwan, People's Republic of China)

Ultrasonic welding and characteristics of glass-fiber reinforced plastic: comparison between the paper-making method and the impregnation method 427
S.-i. Matsuoka (Toyama, Japan)

Development and validation of a finite-element model for multiple-pass radial forging 432
J.P. Domblesky (Toledo, USA), R. Shivpuri (Columbus, USA)

The simulation of the viscoplastic forming process by the finite-element method 442
M. Fu (Nanchang, China), Z.J. Luo (Xian, China)

Recycling of composite materials 448
M. Buggy, L. Farragher, W. Madden (Limerick, Ireland)

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.
